

IMPROVE

Data Quality Assessment

IMPROVE THE QUALITY OF YOUR DATA BEFORE MAKING COSTLY MISTAKES IN BUSINESS ANALYTICS AND INTELLIGENCE

Overview

Assess how **Data Quality** meets business needs, policies, procedures and standards at the level of transactions, analytics, reference data, master and meta data. A critical precursor to any kind of Business Intelligence or Analytics initiative, 'clean fuel' is needed for the engine before any kind of analytics is undertaken, preventing embarrassing errors from bad data.

Deliverables

The deliverables from this service include:

- › Definition of data sources
- › Data Accuracy Assessment
- › Data Duplication and Error Rate
- › Overall Data Quality Index/Rating
- › Recommendations and Road-map for remediation activities

Services

Our **Data Improvement** service includes:

- › Requirements gathering & definition
- › Agree sampling methods and models
- › Agree sample data sources & collection method
- › Based on our rules-based methodology
- › Identify data quality causes

ENSURING DATA QUALITY

Ongoing monitoring of data quality ensures compliance, reduces risk and ensures analytics accuracy.
