

MATURE

Data Resilience Maturity Assessment

ASSESS YOUR DATA
RESILIENCE MATURITY
TO MINIMISE RISK
AND MAXIMISE
OPPORTUNITY

Overview

Our **8-point Data Resilience Model** provides an end-to-end framework against which we measure Data Resilience Maturity. The domains are: Cyber Security, Insider Threats, Privacy and Breach Management, Insurance, Data Governance, Data Quality, Business Continuity and IT Disaster Recovery and Legislative & Compliance Obligations.

Based on a **Capability Maturity Model (CMM) framework**, we present as a simple, intuitive dashboard, with the current level of maturity across our **Data Resilience** model. The detail behind each domain includes drill-down capability, to enable further analysis and identification of areas for improvement in maturity. Process improvements, new platforms, tools and additional training and awareness may need to be implemented.

Approach

We undertake a **baseline assessment** via a combination of workshops, surveys and software tools, taking into account your overall Data Strategy and Business Analytics goals.

The output from this service form the basis upon which maturity of data strategies, tools and business intelligence can be managed .

BETTER INSIGHTS

Solid **Data Resilience Maturity** foundations, clearly defined requirements and tailored tools and processes ensure provide you of the best business insights and outcomes.
